### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: specification page 16 does include the claim 1.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-2 are rejected under 35 U.S.C. 102(a) as being anticipated by Suzuki (US 5995220).

With respect to claim 1 Suzuki discloses lighting means located over the element (see numerical 1 element and numerical 4 lighting means); a prism located over lighting means (see figure 1, numerical 7); a camera located over prism, (see figure 1, numerical 5); and an image processing system (see figure 1 numerical 50) as claimed.

Art Unit: 2623

With respect to claim 2, he further discloses the prism is made of transparent material, (see col. 3, lines 28-32) as claimed.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki in view of Bouvier (US 6177954).

Art Unit: 2623

With respect to claims 3 and 4, Suzuki discloses the invention substantially as disclose and as describe above in claim rejection of claim 1. However, Suzuki fails to disclose the lighting means as LED's arranged in ring, as claimed in claims 3 and 4. Bouvier in object inspection system teaches a lighting means as LED's arranged in ring, (see figure 1, numerical 14 as LED's and col. 3, lines 18-20 for the ring arrangement) as claimed.

The references are combinable as they are analogous because they are solving similar problem of optical inspection of semiconductor material.

Therefore, one ordinary skilled in the art at the time of invention can obviously consider the light source be arranged in an ring fashion because Suzuki suggested that in col. 3, lines 15 and 16.

***Allowable Subject Matter***

7. Claims 5-9 are allowed.
